

## Jacket measurements

### Neck circumference

Measure around the lower part of the neck. Put one finger between the measuring tape and the neck.

Value: \_\_\_\_\_

### Shoulder width

Measure between the outermost edges of the shoulders. Good reference points for the start and end are the seams on the edge of the shoulders. Measure across, close to the lowest part of the shirt collar.

Value: \_\_\_\_\_

### Chest circumference

Measure around the chest where it is largest, right across the nipples. Breathe normally. Note that this measurement should be taken with a finger inside the measuring tape.

Value: \_\_\_\_\_

### Stomach circumference

Measure around the stomach, in line with the navel. Breathe normally. Note that this measurement should be taken with a finger inside the measuring tape.

Value: \_\_\_\_\_

### Buttocks

Measure around the largest point of the buttocks. Note that this measurement should be taken with a finger inside the measuring tape.

Value: \_\_\_\_\_

## Jacket length

Start at the middle of the shoulder. A good reference for the starting point is the shoulder seam of your shirt. Measure straight down to the middle of the thumb, or where you want the jacket to end. Breathe normally.

Value: \_\_\_\_\_

## Shirt length

Start at the middle of the shoulder. A good reference for the starting point is the shoulder seam of your shirt. Measure straight down to the middle of the thumb, or where you want the shirt to end. Breathe normally.

Value: \_\_\_\_\_

## Bicep

Measure around the widest part of the bicep. Let your arm hang relaxed down by your side. Note that this measurement should be taken with a finger inside the measuring tape.

Value: \_\_\_\_\_

## Jacket sleeve length

From the outermost edge of the shoulder, same point as the shoulder measurement, measure down to the start of the thumb. The arm should hang straight down.

Value: \_\_\_\_\_

## Shirt sleeve length

From the outermost edge of the shoulder, same point as the shoulder measurement, measure down to the start of the thumb. The arm should hang straight down. For best style, ensure your shirt sleeve length is about an inch or 2 cm longer than your jacket sleeve length.

Value: \_\_\_\_\_

## Wrist

Measure around the wrist directly below the wrist joint. Note that this measurement should be taken with a finger inside the measuring tape.

Value: \_\_\_\_\_

## Waistcoat length

Start at the middle of the shoulder. A good reference for the starting point is the shoulder seam of your shirt. Measure straight down to the waistline of your trousers. Measured this way the waistline of the trousers will be right below the lowest button on the waistcoat.

Value: \_\_\_\_\_

## Dress coat front length

Start at the middle of the shoulder. A good reference for the starting point is the shoulder seam of your shirt. Measure straight down to the waistline of your trousers.

Value: \_\_\_\_\_

## Morning coat front

Start at the middle of the shoulder. A good reference for the starting point is the shoulder seam of your shirt. Measure straight down to the middle of the thumb.

Value: \_\_\_\_\_

## Coat tail length

Start at the middle of the shoulder. A good reference for the starting point is the shoulder seam of your shirt. Measure down to the back of your knee, or where you want the tail to end.

Value: \_\_\_\_\_

## Frock coat waistline

Start at the middle of the shoulder. A good reference for the starting point is the shoulder seam of your shirt. Measure down to the navel, or where you want the frock coat waistline to be.

Value: \_\_\_\_\_

## Frock coat length

Start at the middle of the shoulder. A good reference for the starting point is the shoulder seam of your shirt. Measure down to the top of your knee cap, or where you want the frock coat to end.

Value: \_\_\_\_\_

## Trouser measurements

### Waist

This measurement determines the waistline of your trousers. Measure around the waist, at the point where you want your trousers to rest. Take this trouser measurement first, as some other measurements use the waist point as reference. If you are wearing a belt, remove it for this measurement. A helpful tip is to wear a pair of trousers that fit you well at the waist.

Value: \_\_\_\_\_

### U-measurement

Measure from the desired waistline in the front to the desired waistline in the back. If in doubt about the tightness of this measurement, take it while wearing a pair of trousers that fit you well.

Value: \_\_\_\_\_

### Buttocks

Measure around the largest point of the buttocks. Note that this measurement should be taken with a finger inside the measuring tape.

Value: \_\_\_\_\_

### Thigh

The thigh measurement should be taken level with the lowest point of the U-measurement. At this point, measure around the thigh. Note that this measurement should be taken with a finger inside the measuring tape.

Value: \_\_\_\_\_

### Leg length

Measure down the outside of the leg. Start at the desired waist level and measure down to where you want the trousers to end. We strongly recommend taking this measurement with shoes on. A good reference for the end point is the top of the heel of your shoe. If you are not wearing shoes, measure down to the ground.

Value: \_\_\_\_\_

## End of trouser leg circumference

This measurement determines the circumference of the trousers. This measurement is taken at the bottom of the trouser leg. Note that this measurement should give the circumference of the trouser leg, not your ankle.

Value: \_\_\_\_\_
